

11 DEC 1974

MEMORANDUM FOR: Director, Central Reference Service
SUBJECT : Project SAFE

Dear Harry:

STATINTL As you may be aware, representatives from
STATINTL several divisions of the Office of Logistics were briefed
by [] on 4 November 1974 on the
SAFE project. Obviously, when this project is implemented,
there will be a major logistics impact in both the facilities
and procurement areas. Accordingly, I have designated
STATINTL Mr. [] a mechanical engineer with our
Real Estate and Construction Division, to be the Logistics
focal point for this project. He will, of course, contact
the appropriate elements of Logistics as required for all
logistical support aspects of this project as it develops.

STATINTL It is considered important that our Logistics
representative participates in the project definition and
design phase of Project SAFE in order to provide maximum lead-
time for procurement or facilities construction activities.
STATINTL To this end, Hank has already been interfacing with []
[] and other Project SAFE officers. If this arrange-
ment is agreeable with you, I would propose to rely on a single
focal point officer during this definition phase, although
clearly Logistics will require participation by a larger staff
when project implementation actually begins. Please advise if
you concur in this nomination.

Signed: James H. McDonald
